Video Player

https://github.com/JoelLeeJie/Video-Player
- Created using FFmpeg and SDL2, in C++.
- A full audio and visual Video Player with basic functionality that integrates Windows' file explorer.

GenshinDB

https://github.com/JoelLeeJie/GenshinDatabase

An interactive database application for one of my favourite games Genshin Impact.
- A WPF .NET Database application created using PostgreSQL and C#.
- It first sources and formats data from an official genshin wiki, and stores that information into a database hosted on Neon.Tech.
- Data is then accessed from this database and displayed to the user through WPF.
